1 Introduction

- Introduce the problem

  - fast release cycle frameworks, etc
  - Developers need to keep up
  - Describe the whole document (structure)

- Many sources for info, overload

- Create summarizer to reduce load

2 State of the art

- papers on summarization

3 Project requirements and analysis

3.1 Challenges

- Difference in websites

- Keep code intact

- Aggregation of multiple pages?

3.2 Algorithm Overview

- Explain LexRank, HoliRank

- Explain similarity function

- Explain how the challenges were solved

4 __PROJECT__NAME__

4.1 Overview

4.2 Architecture

4.2.1 Parser

4.2.2 Service

- Stormed service

- HoliRank

4.2.3 Browser Extension

5 Implementation Issues

5.1 Limitations of approach

- Chunks are discarded, text itself not summarized

- Complexity on larger graphs

6 Conclusion
